Our service collects your organic waste right from your doorstep, turning it into nutrient-rich compost

Convenient: Save time and effort with home collection.

Eco-friendly: Actively reduce landfill waste and support a greener future.

Hassle-free: Stay environmentally conscious without the inconvenience.

How Does It Work?

Separate your food waste from normal waste. Dispose your food & garden waste into the provided wheelie bin.

Bins are collected weekly & taken to our organic waste disposal facility.

Waste is processed to produce a range of high-quality compost products.

In return you will receive a high-quality bag of compost every 2 weeks. Additional compost can be ordered from our website.

✓ EASY-TO-USE SERVICE

On collection day, simply place your organic waste bin kerbside by 7 AM, alongside your regular municipal refuse. Our team will handle the rest, ensuring your organic waste is collected efficiently and transported for composting. This straightforward approach eliminates any hassle, making sustainable waste management as easy as possible.

✓ FREE COMPOST FOR SUBSCRIBERS

As a token of our appreciation, subscribers will receive a free bag of compost every second week. This compost is perfect for your garden, helping you create a sustainable cycle by returning valuable nutrients to the soil.

✓ COMMIT TO A GREENER FUTURE

Our minimum subscription term is six months, allowing you to fully integrate our service into your waste management routine and witness the benefits over time. Terms and conditions apply, ensuring clarity and transparency in our services.

What Is Organic Waste?

Used serviettes, paper towels, toilet roll cores and pizza boxes.

Food waste from vegetables, fruit peels, egg shells and leftover food (no meaty bones).

Flowers, leaves and grass cuttings.
